**ECO Bond Vinyl Installation**

**Installation Guide**

1. **68°F (20°C)**
   - Store adhesive at a minimum temperature of 68°F (20°C) for 24 hours prior to installation.
   - Condition flooring per manufacturer’s recommendations.

2. · Ensure substrate, flooring and surrounding areas are clean and dust free.
   · Damp-mop substrate if dust is present.
   · Only use Portland based patching and leveling compounds.

3. · Wipe hand across surface.
   · If dust transfers, substrate is not clean.

4. · HVAC must be continuously operated for a minimum of 72 hours at a temperature of no less than 68°F (20°C) prior to installation.

5. · Protect from overspray with a spray shield, drop cloths, paper or masking.

6. · Shake aerosol can well for 30 seconds.
   · Remove white cap.

7. · Attach hand lever.
   · Slide under lip. **OR**
   · Use your finger.

8. · Stand straight up, bend over only when necessary.
   · Adhesive should spray out in a wide mist and fall similar to snow towards desired surface.
   · Hold can upside down slightly away from the body as illustrated, approximately 20-30 inches (50-76 cm) horizontally from the substrate. Aim at floor and press hand lever or press tip with finger.

9. · Smoothly walk back and forth to uniformly apply adhesive and achieve results in the photo on the reverse side.
   **NOTE**
   - Spraying in a sweeping motion may result in an inconsistent spray pattern.
   - Excess buildup or inconsistent spray pattern on substrate may cause telegraphing.

**Coverage**
- 150-185 ft²

**Per-can**
10. To ensure optimal spray pattern, remove any adhesive build up that may occur during the application process.

11. Wipe overspray off with a damp cloth. If overspray dries, remove with mineral spirits.

12. Allow adhesive to dry until there is no adhesive transfer when lightly touched.

   High humidity and/or low temperature increases tack time.

13. Open time after application is 4 hours. While open, ensure that adhesive is not contaminated by dust.

14. Follow flooring manufacturer’s recommendations for installation.

   Position Tile or Plank.

   Ensure proper alignment before application of pressure.

   Reposition as necessary.

15. Roll flooring with a 100 lb. (45 kg) roller within 1 hour after installation to complete the bonding process.

   After rolling, floor is ready for all access.

Coverage Per Can
150-185 ft² (13.9-17.1 m²)
Match spray pattern by placing guide on floor.
